April 22, 2011

Dear Pension Board Trustees and Members of the Fund:

We submit to you the Comprehensive Annual Financial Report (CAFR) of the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County (Fund) for the calendar year ended December 31, 2010. The contents of this report, including the financial statements, are the responsibility of the management of the Fund.

To the best of our knowledge and belief, the information contained in this report is complete and accurate in all material respects and is provided to allow the reader to gain an understanding of the Fund's operational activities.

For further management discussion of the financial statements included, we ask readers to review this report in conjunction with the Management Discussion and Analysis (MD&A) found in the Financial Section.

Fund Background

The Fund was established in 1931 by an act of the Illinois Legislature. It is a defined benefit pension plan that provides retirement, survivor, death, health and disability benefits to qualified employees and retirees of the Forest Preserve District of Cook County. The Fund is administered in accordance with 40 ILCS 5/10-101, et seq. The Fund is considered to be a component unit of the Forest Preserve District of Cook County, Illinois and is included in the Forest Preserve District's financial statements as a pension trust fund.

The Fund is governed by a nine member Board of Trustees. Two Trustees serve as ex-officio Trustees (Comptroller and Treasurer of Cook County, or someone designated by them). Seven Trustees are elected as follows; one from active employees of the Forest Preserve District; one from annuitants of the Forest Preserve Fund; three from active employees of Cook County; and two from annuitants of the Cook County Fund. Elected Trustees serve staggered three-year terms, so that not more than three Trustee positions are up for election each year.

As of December 31, 2010, the Fund consisted of 448 active members; 344 retirement annuitants; 161 survivor annuitants and 1,049 inactive members.

Accounting System and Internal Control

In 2010, the Board of Trustees completed an RFP for auditing services. After review and analysis of the responders, the Board voted to retain the Fund's current auditor, Legacy Professionals LLP. This report and the financial statements included were prepared to conform to the principles of governmental accounting and reporting pronounced by the Governmental Accounting Standards Board and the American Institute of Certified Public Accountants.

The financial statements were prepared using the accrual basis of accounting. In accordance with the accrual basis of accounting, revenues are recognized in the accounting period in which they are earned, without regard to the date of collection, and expenses are recognized when the corresponding liabilities are incurred, regardless of when payment is made.

The Fund maintains a system of internal controls to adequately safeguard its assets and assure the reliability of its financial records. These controls are designed to provide reasonable, but not absolute, assurance that these objectives are met. Fund management as well as its outside auditor, Legacy Professionals LLP, continually reviews those controls for adequacy. The financial statements included in this report were audited by Legacy Professionals LLP and they have issued an unqualified opinion for calendar year ended December 31, 2010. A copy of their report is contained in the Financial Section.

Investments

The Trustees' authority to invest the Fund's assets is governed by 40 ILCS 5/1-101, et seq. and 40 ILCS 5/10-101, et seq. The Fund's Investment Policy provides additional strategies and safeguards for the Fund's investment objectives and can be found at www.cookcountypension.com.

The Board of Trustees also completed and RFP for investment consulting services. After review and analysis of the responders, the Board voted to engage Callan Associates, Inc. as its new investment consultant, effective January 1, 2011.

As of December 31, 2010, the total invested assets of the Fund were $171.0 million compared to $160.7 million as of December 31, 2009. The Fund's investment portfolio rate of return for year ended December 31, 2010 was 13.1% compared to portfolio rate of return of 17.9% for year ended December 31, 2009. Additional information regarding Fund investments can be found in the Investment Section.

The Board of Trustees, along with Fund staff and the Investment Consultant, maintain an asset allocation designed to exceed the Fund's actuarial rate of return with minimum risk. The Trustees continue to monitor and adjust their strategic asset allocation among investment types and manager styles. Refer to the Schedules of Investment Manager Fees and Brokerage Commissions in the Investment Section for information regarding investment professionals who provide services to the Fund.

Funding Status

A common measurement to identify the health of a pension fund is the funded ratio, the ratio of assets to liabilities. This ratio is expressed in terms of actuarial values which are calculated using assumptions pertaining to retirement, termination and mortality rates, future salary trends as well as the actuarial rate of return.

The Fund engages an independent actuary to perform an actuarial valuation on an annual basis, pursuant to the provisions of Illinois Statutes. Goldstein & Associates conducted the actuarial valuation for year ended December 31, 2010. Goldstein & Associates used the same actuarial assumptions for the year ended December 31, 2010 actuarial valuation as were used for the December 31, 2009 valuation. These actuarial assumptions are based on an experience analysis for the period 2005 through 2008.

Based on the December 31, 2010 valuation, the funded ratio was 65.19%. The actuarial accrued liability for benefits was $282,391,153, and the actuarial value of assets was $184,077,516, resulting in an unfunded actuarial accrued liability of $98,313,637. Additional information regarding funding can be found in the Actuarial Section.

Major Initiatives

The Fund and its Trustees continued to work to enhance the Fund's investment program, strengthen the Fund's benefits through legislation and improve office operations.

Investments

The Fund's rate of return for the year ended December 31, 2010 was 13.1% slightly overperforming the policy benchmark of 12.2%. The Fund continues to attempt to maximize investment performance while maintaining acceptable levels of risk. The Board maintained its target asset allocation at 40% domestic equity, 15% international equity, 25% fixed income, 10% real estate and 10% hedge funds of funds.

Legislation

Senate Bill 1946 was signed into law on April 14, 2010 as Public Act 96-0889 and created a "second tier" of benefits for employees who became participants under the Fund on or after January 1, 2011. The Fund instructed its actuary to conduct an impact analysis of the benefit changes associated with SB 1946.

The Board continues to pursue legislation aimed at allowing the Forest Preserve District to use other sources of revenue to contribute to the Fund and to increase employer contributions. The Trustees and Fund staff continue to work diligently to represent the interest of the members through further accomplishments of the Trustees' legislative agenda.

Office Operations

The Fund implemented enhancements for disability applications and processes to streamline and communicate with members more efficiently. Member payroll data was automated which expedited the benefit application process.

As a result of the enactment of SB 1946, the Fund upgraded the Pension Benefit Management System to accommodate the new eligibility requirements with this new legislation. The Fund is currently working on System enhancements to accommodate the "second tier" benefits for new members.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to Forest Preserve District Employees' Annuity and Benefit Fund of Cook County for its comprehensive annual financial report for the fiscal year ended December 31, 2009. This was the 1st year that the Fund has achieved this prestigious award. In order to be awarded a Certificate of Achievement, the Fund must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgements

This report was prepared through the combined efforts of the Fund's staff under the direction of the Board of Trustees. On behalf of the Board of Trustees, I would like to thank the staff and professional consultants for their efforts in compiling this report.

REPORT OF INDEPENDENT AUDITORS

To the Board of Trustees of
Forest Preserve District
Employees' Annuity and
Benefit Fund of Cook County

We have audited the accompanying combining statements of pension plan and postemployment healthcare plan net assets of Forest Preserve District Employees' Annuity and Benefit Fund of Cook County (the Plan) as of December 31, 2010 and 2009, and the related combining statements of changes in pension plan and postemployment healthcare plan net assets for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Plan's management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of Forest Preserve District Employees' Annuity and Benefit Fund of Cook County as of December 31, 2010 and 2009 and the changes in its financial status for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Management's Discussion and Analysis, and the required supplementary information consisting of the schedule of funding progress, the schedule of employer contributions and the notes to those schedules are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audits were conducted for the purpose of forming an opinion on the financial statements taken as a whole. The additional information is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audits of the financial statements and, in our opinion for 2010 and 2009, is fairly stated in all material respects in relation to the financial statements taken as a whole.

We also have previously audited the financial statements for the years ended December 31, 2008, 2007, 2006, and 2005 (which are not presented herein), and we expressed unqualified opinions on those financial statements. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements from which it has been derived. Our reports for 2008, 2007, 2006 and 2005 on the required supplementary information stated that we applied limited procedures, which consisted principally of inquiries of management regarding the methods of measurements and presentation of the supplementary information, but did not audit the information and expressed no opinion on it.

Management's Discussion and Analysis (Unaudited)

This section presents Management's Discussion and Analysis of the financial position and performance of the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County's (Plan) for the year ended December 31, 2010. This discussion is presented as an overview of the financial activities of the Plan and should be read in conjunction with the Plan's financial statements.

Overview of the Financial Statements

The following discussion and analysis is intended to serve as an introduction to the Plan's basic financial statements. The financial statements are prepared on an economic sources focus and accrual basis of accounting in accordance with Governmental Accounting Standards Board (GASB) pronouncements. The basic financial statements are described below:

Combining Statements of Pension Plan and Postemployment Healthcare Plan Net Assets provides a snapshot of account balances and net assets held in trust for future benefit payments and any liabilities as of the Plan's year end. Over time increases and decreases in net assets may serve as a useful indicator of whether the financial position of the Plan is improving or deteriorating.

Combining Statements of Changes in Pension Plan and Postemployment Healthcare Plan Net Assets shows the revenues (additions) and expenses (deductions) during the year, where additions less deductions equal net increase (decrease) in net assets. The net increase (decrease) in net assets illustrates the change in net assets as reported in the Statements of Plan Net Assets from the prior year to the current year.

Notes to the Financial Statements provides additional information that is essential to achieving a better understanding of the data provided in the financial statements.

Required Supplementary Information provides two schedules and related notes concerning actuarial information, funded progress and employer contributions.

Additional Information includes schedules of administrative expenses, professional and consulting fees, investment expenses, additions by source and deductions by type and taxes receivable.

Financial Highlights

Net assets increased by $11,840,912 or 7.3% from $162,057,788 at December 31, 2009 to $173,898,700 at December 31, 2010. Comparatively, net assets increased by $16,738,241 or 11.5% from $145,319,547 at December 31, 2008 to $162,057,788 at December 31, 2009. The change in net assets for both years was primarily due to the fluctuation in the fair market value of the investments.

The **rate of return** of the Plan's investment portfolio was 13.1% for 2010, 17.9% for 2009 and -24.1% for 2008.

The **actuarial funded ratio** of the combined pension and the postemployment healthcare plans for 2010 was 65.19% compared to 68.75% for 2009. The decrease in the funded ratio during 2010 was due to the actuarial smoothing of 2008 investment losses over a five year period. The 2008 funded ratio was 82.49%.

Plan Net Assets

The condensed Statements of Plan Net Assets reflects the resources available to pay benefits to members. A summary of the Plan Net Assets is as follows:

	Plan Net Assets As Of December 31,			Current Year Increase/(Decrease) in	
	2010	2009	2008	Dollars	Percent
Total assets	$186,211,633	$174,499,289	$153,364,798	$11,712,344	6.7%
Total liabilities	12,312,933	12,441,501	8,045,241	(128,568)	-1.0%
Net assets	$173,898,700	$162,057,788	$145,319,547	$11,840,912	7.3%

Changes in Plan Net Assets

The condensed Statements of Changes in Plan Net Assets reflects the changes in the resources available to pay benefits to members. A summary of the Changes in Plan Net Assets is as follows:

	Changes in Plan Net Assets for the Years Ended December 31,			Current Year Increase/(Decrease) in	
	2010	2009	2008	Dollars	Percent
Additions					
Employer contributions	$ 2,660,034	$ 2,543,694	$ 2,023,448	$ 116,340	4.6%
Employee contributions	2,452,696	2,418,794	2,119,208	33,902	1.4%
Investment income (loss)					
(includes security lending activities)	20,250,639	24,683,791	(46,414,013)	(4,433,152)	-18.0%
Other	227,553	219,919	127,464	7,634	3.5%
Total additions	25,590,922	29,866,198	(42,143,893	(4,275,276)	-14.3%
Deductions					
Benefits	13,043,407	12,423,521	12,159,401	619,886	5.0%
Refunds	343,863	472,953	518,400	(129,090)	-27.3%
Employee transfers to (from) Cook County	257,975	118,754	(119,434)	139,221	117.2%
Administrative expenses	104,765	112,729	138,550	(7,964)	-7.1%
Total deductions	13,750,010	13,127,957	12,696,917	622,053	4.7%
Net increase (decrease)	11,840,912	16,738,241	(54,840,810)	(4,897,329)	-29.3%
Net assets:					
Beginning of year	162,057,788	145,319,547	200,160,357	16,738,241	11.5%
End of year	$173,898,700	$162,057,788	$145,319,547	$11,840,912	7.3%

Additions to Plan Net Assets

Total additions were $25,590,922 in 2010, $29,866,198 in 2009 and $(42,143,893) in 2008.

Employer contributions increased to $2,660,034 in 2010 from $2,543,694 in 2009 and $2,023,448 in 2008. Employer contributions are statutorily set at 1.30 times employee contributions collected two years prior.

Employee contributions, including permissive service credit purchases, increased to $2,452,696 in 2010 from $2,418,794 in 2009 and $2,119,208 in 2008. Employees contribute 8.5% of covered wages.

Net investment income totaled $20,250,639 for 2010 compared to $24,683,791 for 2009. Comparatively, net investment (loss) totaled $(46,414,013) for 2008. The increase (decrease) in investment earnings resulted primarily from the overall performance of the financial markets from year to year.

Deductions to Plan Net Assets

Total deductions were $13,750,010 in 2010, $13,127,957 in 2009 and $12,696,917 in 2008.

Benefits increased to $13,043,407 in 2010 from $12,423,521 in 2009 and $12,159,401 in 2008 due primarily to the 3% annual cost of living increases for annuities.

Refunds decreased to $343,863 in 2010 from $472,953 in 2009 and decreased from $518,400 in 2008 due to fluctuations in refund applications.

Plan member transfers to (from) Cook County resulted from Forest Preserve District employees transferring employment to (from) Cook County. The accrued pension benefit obligation is transferred to (from) the Forest Preserve Fund (to) from the Cook County Fund.

The cost to administer the Plan decreased to $104,765 in 2010 from $112,729 in 2009, primarily due to a decrease in allocated professional and consulting fees. Comparatively, the cost to administer the Plan decreased to $112,729 in 2009 from $138,550 in 2008.

Funding Status

The actuarial assets, liabilities and funding status for the Plan (including the pension and postemployment healthcare plans) are provided below:

	Actuarial Values December 31,			Current Year Increase/(Decrease) in	
	2010	2009	2008	Dollars	Percent
Actuarial assets	$184,077,516	$188,396,534	$196,277,679	$(4,319,018)	-2.3%
Actuarial liabilities	282,391,153	274,032,351	237,927,630	8,358,802	3.1%
Unfunded actuarial liabilities	$ 98,313,637	$ 85,635,817	$ 41,649,951	$12,677,820	14.8%
Funded ratio	65.19%	68.75%	82.49%		

Actuarial assets decreased to $184,077,516 in 2010 from $188,396,534 in 2009 due to large investment losses during 2008 after using the five-year smoothing of market values used to determine the actuarial value of assets. Comparatively, actuarial assets decreased to $188,396,534 in 2009 from $196,277,679 in 2008.

Actuarial liabilities increased to $282,391,153 in 2010 from $274,032,351 in 2009 due to increased benefits accrued by plan participants. Comparatively, actuarial liabilities increased to $274,032,351 in 2009 from $237,927,630 in 2008.

The **funded ratio** is one indicator of the financial strength of the Plan, measuring the ratio of net assets available to meet the actuarially determined future liabilities of the Plan. The decrease in the funded ratio to 65.19% in 2010 from 68.75% in 2009 was due to the changes in the actuarial assets and actuarial liabilities as explained in the preceding paragraphs. Comparatively, the funded ratio decreased to 68.75% in 2009 from 82.49% in 2008.

Contact Information

This financial report is designed to provide the employer, plan participants and others with a general overview of the Plan's finances and show accountability for money it receives. Questions concerning any data provided in the report or requests for additional information should be addressed to:

Notes to Financial Statements

Note 1: Summary of Significant Accounting Policies

The Forest Preserve District Employees' Annuity and Benefit Fund of Cook County is administered in accordance with Chapter 40, Article 5/10 of the Illinois Compiled Statutes (formerly Chapter 108-1/2, Article 10 of the Illinois Revised Statutes).

New Accounting Pronouncement - Effective during the year ended December 31, 2010, the Plan implemented GASB Statement No. 53, Accounting and Financial Reporting for Derivative Instruments. The statement addresses the recognition, measurement, and disclosure of information regarding derivative instruments entered into by state and local governments. The adoption of the statement did not have a significant impact on the Plan.

Method of Accounting - The financial statements are prepared using the accrual basis of accounting. Employer contributions are recognized in the levy year. Employee contributions are recognized in the period in which contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

Investments - Investments are reported at fair value, which generally represents reported market value as of the last business day of the year. Alternative investments are carried at fair value as estimated by each partnership's general partner. Short term investments are carried at cost which approximates fair value. Where less than an entire holding is sold, average value is used to determine realized gain or loss.

Allocated Expenses - Administrative expenses are initially paid by the County Employees' and Officers' Annuity and Benefit Fund of Cook County (County Fund). These expenses are allocated between the County Fund and the Plan on a pro rata basis as applicable.

Capital Assets - The Plan has set a capitalization threshold of $100,000 for all capital asset types. As of December 31, 2010, the Plan does not have any capital assets.

Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

Subsequent Events - Subsequent events have been evaluated through April 22, 2011, which is the date the financial statements were available to be issued.

Note 2: Plan Description

The Forest Preserve District Employees' Annuity and Benefit Fund of Cook County was established on July 1, 1931 and is governed by legislation contained in the Illinois Compiled Statutes, particularly Chapter 40, Article 5/10. The Plan can be amended only by the Illinois Legislature. The Forest Preserve District Employees' Annuity and Benefit Fund of Cook County is a single employer defined benefit pension plan with a defined contribution minimum. The Plan was created for the purpose of providing retirement, death and disability benefits for full-time employees of the Forest Preserve District of Cook County, Illinois (Forest Preserve District) and the dependents of such employees. The Plan is considered to be a component unit of the Forest Preserve District of Cook County, Illinois and is included in the Forest Preserve District's financial statements as a pension trust fund.

The Statutes authorize a Board of Trustees (Board) of nine members to carry out the provisions of the Article. According to the Article, two members of the Board are ex officio, four are elected by the employee members of the Plan and three are elected by the annuitants of the Plan. The two ex officio members are the Comptroller of Cook County, or someone chosen by the Comptroller, and the Treasurer of Cook County, or someone chosen by the Treasurer. All members of the Board are fiduciaries with respect to the Plan and are statutorily mandated to discharge their duties, as such, solely in the interest of the Plan's participants and beneficiaries.

The Board has the powers and duties required in the Article to collect all contributions due to the Plan, to invest the Plan's reserves, to have an annual audit, to appoint employees, to authorize or suspend payment of any benefit and to have exclusive original jurisdiction in all matters relating to or affecting the Plan. The Board approves its own budget, which is prepared by the administrative staff of the Plan. The Board is required annually to submit to the Forest Preserve District Board of Cook County a detailed report of the financial affairs and status of the Plan. Provisions in other articles of Chapter 40 require the Board to submit its annual audit and actuarial valuation reports to the State of Illinois Department of Insurance, as well as another detailed annual report, the form and content of which is specified by the Department of Insurance.

Covered employees are required to contribute 8.5% of their salary to the Plan. If an employee leaves covered employment without qualifying for an annuity, accumulated contributions are refunded with interest (3% or 4% depending on when the employee became a participant). The Forest Preserve District's total contribution is the amount of contributions made by the employees to the Plan in the calendar year two years prior to the year for which annual applicable tax is levied, multiplied by 1.30. The source of funds for the Forest Preserve District's contributions has been designated by State Statute as the Forest Preserve District's annual property tax levy. The Forest Preserve District's payroll for employees covered by the Plan for the years ended December 31, 2010 and 2009 was $24,397,376 and $24,967,115 respectively.

The Forest Preserve District Employees' Annuity and Benefit Fund provides retirement as well as death and disability benefits. Employees age 50 or over with at least 10 years of service are entitled to receive a minimum formula annuity of 2.4% for each year of credited service to a maximum benefit of 80% of the final average monthly salary. For retirees between age 50 and age 60, the monthly retirement benefit is reduced 1/2 percent for each month the participant is under age 60. This reduction is waived for participants having 30 or more years of credited service.

Note 2: Plan Description (continued)

At December 31, 2010 and 2009 participants consisted of the following:

	2010	2009
Retirees and beneficiaries currently receiving benefits:		
Employees	344	342
Spouse	150	148
Children	11	11
Disability	9	8
	514	509
Current employees:		
Vested	239	249
Nonvested	209	212
	448	461
Total	962	970

Participants should refer to the summary plan description or applicable State Statutes for more complete information.

Note 3: Funded Status and Funding Progress

As of December 31, 2010, the most recent actuarial valuation date, the Plan was 65.19% funded on an actuarial basis. The actuarial accrued liability for benefits was $282,391,153 and the actuarial value of assets was $184,077,516, resulting in an unfunded actuarial accrued liability (UAAL) of $98,313,637. The covered payroll (annual payroll of active employees covered by the Plan) was $24,397,376, and the ratio of the UAAL to the covered payroll was 402.97%.

Note 3: Funded Status and Funding Progress (continued)

The Schedule of Funding Progress, presented as required supplemental information (RSI) following the notes to the financial statements, present multi-year trend information about whether the actuarial values of the Plan assets are increasing or decreasing over time relative to the actuarial accrued liability for benefits.

Additional information as of the latest actuarial valuation is as follows:

Valuation date	December 31, 2010
Actuarial cost method	Entry Age Normal
Amortization method	Level Dollar - Open
Remaining amortization period	30 years
Asset valuation method	Five Year Smoothed Average Market

Actuarial assumptions:

Investment return rate	7.5% compounded annually
Projected salary increases	
Inflation	3.0% per year
Merit	2.0% per year
Total	5.0% per year
Postretirement annuity increase	3.0% compounded per year
Mortality rates	UP-1994 Mortality Table for Males, rated down 2 years; UP-1994 Mortality Table for Females, rated down 1 year
Termination rates	Based on recent experience of the Plan
Retirement rates	Rates of retirement for each age from 50 to 75 based on recent experience of the Plan. All employees are assumed to retire by age 75
Medical trend rate	8.0% in the first year, decreasing by .5% per year until an ultimate rate of 5.0% is reached

Note 4: Summary of Employer Funding Policies

Employer contributions are funded primarily through a Forest Preserve District tax levy which is currently limited when extended to an amount not to exceed an amount equal to the total contributions by the employees to the Plan made in the calendar year two years prior to the year for which the annual applicable tax is levied, multiplied by 1.30.

The combined actuarial valuations of the pension and retiree health insurance benefits of the Plan as of December 31, 2010 and December 31, 2009 indicate the annual required contribution to be $10,653,889 and $7,273,214 for 2010 and 2009, respectively. The annual required contribution is based on an annual projected payroll of $24,397,376 for 448 active members as of December 31, 2010 and $24,967,115 for 461 active members as of December 31, 2009 and is computed as follows.

	2010	2009
Normal cost	$5,805,265	$5,878,215
30-year level dollar amortization of the unfunded liability	6,970,829	3,390,342
	12,776,094	9,268,557
Less estimated employee contributions	(2,122,205)	(1,995,343)
Actuarially determined contribution requirement	10,653,889	7,273,214
Expected net employer contribution from tax levy after 2.7% loss	(2,680,595)	(2,512,857)
Expected employer contribution short-fall of actuarially determined contribution requirement	$7,973,294	$4,760,357
Required tax levy multiple	5.17	3.76
Present authorized multiple	1.30	1.30

A Schedule of Funding Progress is located in the Required Supplementary Information on page 40. This schedule provides information about progress made in accumulating sufficient assets to pay benefits when due.

Note 5: Investment Summary

The Plan is authorized to invest in bonds, notes, certificates of indebtedness, mortgage notes, real estate, stocks, shares, debentures, or other obligations or securities as set forth in the "prudent person" provisions of the State Statutes. All of the Plan's financial instruments are consistent with the permissible investments outlined in the State Statutes and any index-linked financial instruments are limited to those indices that replicate the permissible investments outlined in the State Statutes. The following table presents a summarization of the fair value (carrying amount) of the Plan's investments as of December 31, 2010 and 2009. Investments that represent 5% or more of the Plan's net assets held in trust for benefits are separately identified.

Investments	2010	2009
Equities	$100,862,750	$ 91,977,030
U.S. Government and government agency obligations	37,873,435	33,051,002
Corporate bonds	17,610,482	16,466,158
Collective investment funds:		
Equity	6,421,555	4,606,017
Fixed income:		
NTGI Daily Aggregate Bond Index Fund	-	8,885,373
Alternative investments	3,158,336	-
Short term investments	5,044,831	5,690,413
Total investments	$170,971,389	$160,675,993

Note 5: Investment Summary (continued)

Investment Risk

Government Accounting Standards Board (GASB) Statement No. 40, Deposit and Investment Risk Disclosures, specifies the disclosure requirements for deposits that are not covered by depository insurance and investment securities that are uninsured and are not registered in the name of the government or trust agent.

Custodial Credit Risk

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Plan will not be able to recover the value of its investments or collateral securities in the possession of an outside party.

The Plan had no investments that were uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent, but not held in the Plan's name as of December 31, 2010 and 2009.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. For the years ended December 31, 2010 and 2009, the Plan's investment policy set the average credit quality for each manager's total fixed income portfolio (corporate and U.S. Government holdings) of not less than A- by two out of three credit agencies (Moody's Investor Service, Standard & Poors and/or Finch). The following table presents a summarization of the Plan's credit quality ratings of investments at December 31, 2010 and 2009 as valued by Moody's Investors Service, Standard & Poor's and/or Finch:

Type of Investment	Rating	2010	2009
U.S. Government and			
government agency obligations	Aaa/AAA	$20,875,259	$20,108,071
	Aa/AA	26,705	-
	A/A	91,252	33,316
	Baa/BBB	-	29,072
	Not Rated	-	105,906
	U.S. Government	16,880,219	12,774,637
		$37,873,435	$33,051,002
Corporate bonds	Aaa/AAA	$ 1,533,496	$ 1,418,072
	Aa/AA	1,731,777	1,486,857
	A/A	8,461,991	7,939,589
	Baa/BBB	5,883,218	5,621,640
		$ 17,610,482	$ 16,466,158
Collective investment funds -			
fixed income	Not Rated	$ -	$8,885,373
Short term investments	Aaa/AAA	$ -	$ 139,410
	Not Rated	5,044,831	5,551,003
		$ 5,044,831	$ 5,690,413

Note 5: Investment Summary (continued)

Investment Risk (continued)

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Investments held for longer periods are subject to increased risk of adverse interest rate changes. For the years ended December 31, 2010 and 2009, the Plan's investment policy set the duration for each manager's total fixed income portfolio to fall within plus or minus 30% of the duration for the fixed income performance benchmark (Barclays Capital Aggregate Fixed Income, which was 4.81 years at December 31, 2010 and 4.55 years at December 31, 2009). The following table presents a summarization of the Plan's debt investments at December 31, 2010 and 2009 using the segmented time distribution method:

Type of Investment	Maturity	2010	2009
U.S. Government and government agency obligations	< 1 year	$ 1,045,722	$ -
	1 - 5 years	18,331,533	15,239,218
	6 - 10 years	4,177,278	4,776,850
	Over 10 years	14,318,902	13,034,934
		$37,873,435	$33,051,002
Corporate bonds	< 1 year	$ 101,144	$ -
	1 - 5 years	8,377,425	7,765,932
	6 - 10 years	6,245,932	6,224,228
	Over 10 years	2,885,981	2,475,998
		$17,610,482	$16,466,158

Note 5: Investment Summary (continued)

Investment Risk (continued)

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. For the years ended December 31, 2010 and 2009, the Plan's investment policy limited the amount of investments in foreign equities to 20% of total Plan assets. The Plan's exposure to foreign currency risk at December 31, 2010 and 2009 is as follows:

Type of Investment	Fair Value (USD) 2010	Fair Value (USD) 2009
Equities:		
Australian dollar	$ 227,071	$ 352,257
British pound	6,952,302	5,422,194
Danish krone	698,572	501,152
European euro	5,245,940	6,093,492
Hong Kong dollar	195,068	779,315
Israeli skekel	162,812	-
Japanese yen	3,061,127	2,244,192
Norwegian krone	199,268	559,266
Singapore dollar	-	197,151
Swiss franc	1,952,957	1,874,927
U.S. dollar	82,167,633	73,953,084
Total equities	$100,862,750	$91,977,030

For the years ended December 31, 2010 and 2009, net realized gain (loss) on investments sold, reflecting the difference between the proceeds received and cost value of securities sold, was $3,250,992 and ($4,690,677) respectively. These amounts are included in the net appreciation (depreciation) in fair value of investments as reported on the Combining Statements of Changes in Pension Plan and Postemployment Healthcare Plan Net Assets. The calculation of realized gains and losses is independent of the calculation of net appreciation (depreciation) in the fair value of plan investments. Investments purchased in a previous year and sold in the current year result in their realized gains and losses being reported in the current year and their net appreciation (depreciation) in plan assets being reported in both the current year and the previous year.

Note 6: Derivatives

The Plan's investment policy permits the use of financial futures for hedging purposes only. Speculation and leveraging of financial futures within the portfolio is prohibited. The Plan uses financial futures to manage portfolio risk and to facilitate international portfolio trading.

A derivative security is a financial contract whose value is based on, or "derived" from, a traditional security, an asset, or a market index. Derivative instruments include futures and forward contracts as part of the Plan's portfolio.

Derivative transactions involve, to varying degrees, credit risk, interest rate risk and market risk. Credit risk is the possibility that a loss may occur because a party to a transaction fails to perform according to the previously agreed upon terms. Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Market risk is the possibility that a change in interest or currency rates will cause the value of a financial instrument to decrease or become more costly to settle.

Forward contracts are used to hedge against fluctuations in foreign currency-denominated assets used primarily in portfolio trade settlements. These contracts are a cash contract in which a seller agrees to deliver a specific cash commodity to a buyer sometime in the future. Forward agreements are subject to the creditworthiness of the counterparties, which are principally large financial institutions. At December 31, 2010 and 2009, the Plan's investments included the following forward currency contract balances:

	2010	2009
Forward Currency Contract Receivables	$ -	$453,367
Forward Currency Contract Payables	$ -	$454,433

All of the Plan's financial instruments are carried at fair value on the Combining Statement of Pension Plan and Postemployment Health Plan Net Assets included in investments. The gain or loss on financial instruments is recognized and recorded on the Combining Statement of Changes in Pension Plan and Postemployment Health Plan Net Assets as part of investment income.

Note 7: Securities Lending

State Statutes and the investment policy permit the Plan to lend its securities to broker-dealers and other entities with a simultaneous agreement to return collateral for the same securities in the future. The Plan's custodian, acting as the lending agent, lends securities for collateral in the form of cash, U.S. Government obligations and irrevocable letters of credit equal to 102% of the fair value of domestic securities plus accrued interest and 105% of the fair value of foreign securities plus accrued interest.

The Plan has a limit as to the amount of securities on loan of $10 million. The Plan does not have the right to sell or pledge securities received as collateral unless the borrower defaults. The average term of securities loaned was 102 days for 2010 and 119 days for 2009; however, any loan may be terminated on demand by either the Plan or the borrower. Cash collateral is invested in a separately managed portfolio, which had an average weighted maturity at December 31, 2010 and 2009 of 104 and 91 days, respectively.

As of December 31, 2010 and 2009, the fair value (carrying amount) of loaned securities was $9,753,433 and $9,584,272 respectively. As of December 31, 2010 and 2009, the fair value (carrying amount) of collateral received by the Plan was $9,993,747 and $9,835,451 respectively.

Although the Plan's securities lending activities are collateralized as described above, they involve both market and credit risk. In this context, market risk refers to the possibility that the borrower of securities will be unable to collateralize the loan upon a sudden material change in the fair value of the loaned securities. Credit risk refers to the possibility that counterparties involved in the securities lending program may fail to perform in accordance with the terms of their contracts.

Indemnification deals with the situation in which a client's securities are not returned due to the insolvency of a borrower. The contract with the lending agent requires indemnification to the Plan if borrowers fail to return the securities fail to pay the Plan for income distributions by the issuers of securities while the securities are on loan.

During 2008, a security within the collateral pool became insolvent resulting in an insufficiency in the collateral pool. To prevent any one investor from incurring an additional loss should another investor exit the securities lending program, the Plan's custodian allocated a portion of the insolvent security to each investor in the collateral pool. As a result of the allocation, the Plan incurred an unrealized investment loss and corresponding securities lending payable in the amount of $99,030 during the year ended December 31, 2008. The securities lending payable was $94,015 and $99,030 as of December 31, 2010 and 2009 respectively.

During 2010 and 2009, there were no losses due to default of a borrower or the lending agent.

Note 7: Securities Lending (continued)

A summary of securities loaned at fair value as of December 31:

	2010	2009
Securities loaned - cash collateral:		
Equities	$7,304,188	$3,395,450
U.S. Government and government agency obligations	1,947,942	6,188,813
Corporate bonds	347,845	9
Total securities loaned - cash collateral	9,599,975	9,584,272
Securities loaned - non-cash collateral:		
Equities	14,528	-
U.S. Government and government agency obligations	138,930	-
Total securities loaned - cash collateral	153,458	-
Total	$9,753,433	$9,584,272

Note 8: Commitment

As of December 31, 2010, the Plan had capital commitments of $3,000,000 for various limited partnerships.

Note 9: Postemployment Group Healthcare Benefit Plan

The Plan has adopted GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, which establishes uniform financial reporting standards for Other Postemployment Benefits (OPEB) plans.

Plan Description

The Forest Preserve District Employees' Annuity and Benefit Fund of Cook County administers a Postemployment Group Healthcare Benefit Plan (PGHBP), a single-employer defined benefit postemployment healthcare plan. PGHBP provides a healthcare premium subsidy to annuitants who elect to participate in PGHBP. The Plan is currently allowed, in accordance with State Statutes, to pay all or a portion of medical insurance premiums for the annuitants. Presently, the Plan subsidizes approximately 55% and 70% of the monthly premiums for employees and spouse annuitants, respectively. The remaining premium cost is borne by the annuitant.

PGHBP is administered in accordance with Chapter 40, Article 5/10 of the Illinois Compiled Statutes, which assigns the authority to establish and amend benefit provisions to the Plan's Board of Trustees.

At December 31, 2010 and 2009, the number of annuitants and surviving spouses whose cost to participate in the program was subsidized, totaled 275 and 282 respectively.

Summary of Significant Accounting Policies

Method of Accounting - PGHBP's financial statements have been combined with the Plan's financial statements and are presented using the accrual basis of accounting. The Plan considers the premium subsidy an additional retirement benefit, with no contribution rate or asset allocation associated with it. The cost for postemployment group health benefits is approximately equal to the premium subsidy. Actual costs may differ based on claims experience. Healthcare premium subsidies are recognized when due and payable.

Contributions - The Plan funds PGHBP on a "pay-as-you-go" basis.

Administrative Costs - Administrative costs associated with PGHBP are paid by the Plan.

Medical Trend Rate - 8.0% in the first year, decreasing by .5% per year until an ultimate rate of 5.0% is reached.

Funded Status and Funding Progress

As of December 31, 2010, the most recent actuarial valuation date, PGHBP was 0.00% funded on an actuarial basis. The actuarial accrued liability for benefits was $43,102,510 and the actuarial value of assets was $0, resulting in an unfunded actuarial accrued liability (UAAL) of $43,102,510. The covered payroll (annual payroll of active employees covered by the Plan) was $24,397,376, and the ratio of the UAAL to the covered payroll was 176.67%.

Note 10: Related Party Transactions

The Plan has common Trustees and shares office space with the County Fund. The Plan reimburses the County Fund for shared administrative services provided by the County Fund. During the years ended December 31, 2010 and 2009, the County Fund allocated administrative expenditures of $63,455 and $66,184 respectively.

As of December 31, 2010 and 2009, the Plan owes the County Fund $1,321,867 and $1,179,097 respectively. These amounts include plan transfers of plan members transferring from one plan to another.

Note 11: Pronouncements Issued Not Yet Effective

In March 2009, GASB issued Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions.* This statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. Statement No. 54 is effective for the Plan's fiscal year ending December 31, 2011.

In December 2009, GASB issued Statement No. 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans.* This statement considers the timing and frequency of the measurement of actuarial liabilities for OPEB by agent employers and also considers the guidelines regarding the use of the alternative measurement method by agent employers with small individual OPEB plans. The provisions related to the frequency and timing of measurements are effective for the Plan's fiscal year ending December 31, 2012.

In June 2010, GASB issued Statement No. 59, *Financial Instruments Omnibus.* This statement updates and improves existing standards regarding financial reporting and disclosure requirements of certain financial instruments and external investment pools for which significant issues have been identified in practice. Statement No. 59 is effective for the Plan's fiscal year ending December 31, 2011.

In November 2010, GASB issued Statement No. 60, *Accounting and Financial Reporting for Service Concession Arrangements.* This statement improves financial reporting by addressing issues related to service concession arrangements, which are a type of public-private or public-public partnership. Statement No. 60 is effective for the Plan's fiscal year ending December 31, 2012.

In November 2010, GASB issued Statement No. 61, *The Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34.* This statement improves financial reporting for a governmental financial reporting entity by modifying certain requirements for inclusion of component units in the financial reporting entity. This statement also amends the criteria for reporting component units as if they were part of the primary government in certain circumstances. The statement also clarifies the reporting of equity interests in legally separate organizations. Statement No. 61 is effective for the Plan's fiscal year ending December 31, 2013.

In December 2010, GASB issued Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements.* This statement is to incorporate into GASB's authoritative literature certain accounting and financial reporting guidance that is included in certain pronouncements issued on or before November 30, 1989, which does not conflict with or contradict GASB pronouncements. Statement No. 62 is effective for the Plan's fiscal year ending December 31, 2012.

The Plan is currently evaluating the impact of adopting the above Statements

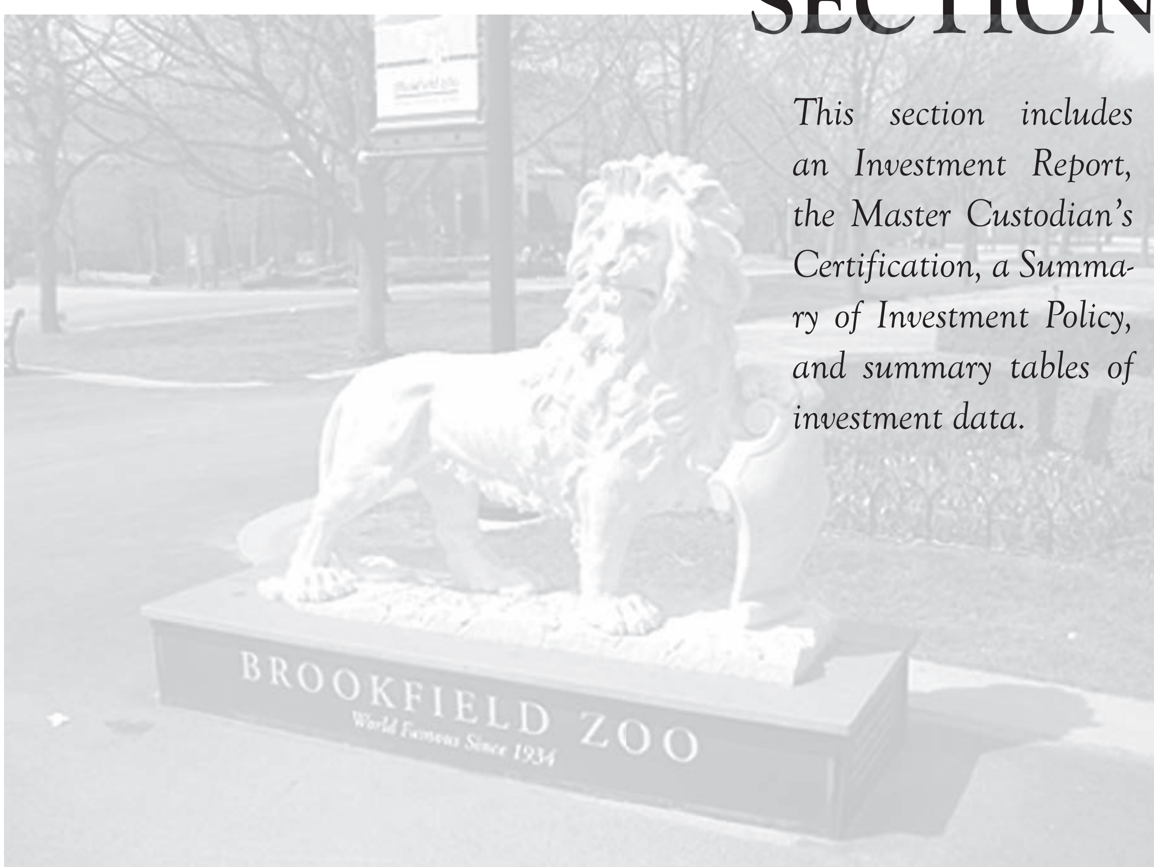
INVESTMENT SECTION



This section includes an Investment Report, the Master Custodian's Certification, a Summary of Investment Policy, and summary tables of investment data.

Investment Report

Presented below is the 2010 summary of the Fund's investment activities prepared by the Fund's Chief Investment Officer and results provided by the Fund's Investment Consultant. Returns have been calculated using geometrically-linked, time and asset-weighted returns. A brief review of the Fund's asset allocation, investment portfolio performance and general market commentary have been provided, as well as cash flow activities.

Asset Allocation

Asset allocation targets have been established for each asset class to minimize overall risk through prudent diversification and to achieve investment return objectives. Investment managers are assigned a mandate within an allocation to invest in specific asset classes with defined security selection styles and methodologies.

As the recovery from the financial market turmoil of 2008 continues, the Fund proactively reviews its asset allocation to test its viability under more dynamic market conditions and benefit funding assumptions.

In 2010, the Fund continued to move toward its asset allocation targets through portfolio rebalancing. This was achieved by the initial and continued funding of its two open-end core real estate managers.

Investment Results

Calendar year results for 2010 continued to show improvement in comparison to the downturn of 2008. As of December 31, 2010, the total fair value of invested assets under management was $171.0 million. For 2010, the Fund earned 13.1%, net of fees, performing ahead of both the actuarial rate of return of 7.5% and its policy benchmark of 12.2%. The Fund's gross of fees performance for the year ranks in the 36th percentile when compared to the Wilshire Associates universes of public pension funds. The portfolio benefited from the continued improvement in domestic and international equity. On an intermediate basis, the Fund has slightly underperformed its policy benchmark for the three and five year periods.

Market Environment

Domestic Equity

Domestic equity posted another strong year with returns in excess of 15% for the year as measured by the S&P 500. Markets were bolstered by the Federal Reserve's second quantitative easing measures, an extension of the Bush-era tax cuts and a return of consumer optimism through year-end. Small Cap funds demonstrated leadership for the year in all categories over Large Cap. Mid Cap (S & P MidCap +26.6%) and Small Cap stocks (S&P 600 +26.5%) outperformed Large Cap stocks (S&P 500 +15.1%). Growth stocks significantly outperformed value stocks across all capitalizations for the year.

International Equity

Overall, non-U.S. stocks (MSCI ACWI ex. U.S. +11.6%) benefited from a weak U.S. dollar and the global coordination of unprecedented fiscal stimulus and monetary accommodation which contributed to a rally in equities. Emerging markets continued to show strength (MSCI Emerging Markets +19.2%), but persistent inflation fears dampened investor enthusiasm. Among the developed markets, Japan posted results of 12.9%, while Europe struggled with debt woes.

Fixed Income

Strong equity markets dampened investor appetite for fixed income as demand for Treasuries dropped, particularly later in the year. However, returns for the Barclay's Aggregate Index fared well for the year at 6.5%. Long duration also performed well for the year posting positive results with returns of 11.3%.

Operating Cash Flow

In aggregate, $9 million, or 5.3% of the year end value of the investment portfolio, was utilized in 2010 to assist in the payment of benefits. These withdrawals are made in conjunction with rebalancing the Fund's portfolio asset allocation target.

Additional Information

The Master Custodian's certification letter for 2010, a summary of the Fund's goals, objectives and guidelines, and select investment schedules follow for your review.

Master Custodian's Certification

BNY MELLON
ASSET SERVICING

May 10, 2011

To the Board of Trustees and the Executive Director:

BNY Mellon as custodian of the Forest Preserve District Employees Annuity And Benefit Fund (the "client") has established an "Account" that holds the clients property in safekeeping facilities of the Custodian (or other custodian banks or clearing operations), provided the recordkeeping of certain property of the client and completed the annual accounting certification for the year January 1, 2010 through December 31, 2010.

In addition, in accordance with the terms of the Custody Agreement dated, October 1, 2007, BNY Mellon also provides the following services as Custodian:

- Market settlement of purchases and sales and engage in other transactions, including free receipts and deliveries, exchanges and other voluntary corporate actions, with respect to securities or property received by the Custodian
- Take actions necessary to settle transactions in futures and/or options contracts, short selling programs, foreign exchange or foreign exchange contracts, swaps and other derivative investments with third parties
- Lend the assets of the Account in accordance with a separate Securities Lending Agreement.
- Invest available cash in any collective fund, including a collective investment fund maintained by the Custodian or and affiliate of the Custodian for collective investment of employee benefit trusts or deposit in an interest bearing account of banking department of Custodian.
- Appoint subcustodians, including affiliates of the custodian, as to part or all of the Account.
- Hold property in nominee name, in bearer form or in book entry form, in a clearinghouse corporation or in a depository.
- Take all action necessary to pay for, and settle authorized transactions.
- Collect income payable to and distributions due to the Account.
- Collect all proceeds from securities, certificates of deposit or other investments which may mature or be called.
- Forward to the authorized party as designated by the client, proxies or ballots that are to be a voted by the authorized party.
- Attend to corporate actions that have no discretionary decision requirement
- Report the value of the Account as agreed upon by the client and custodian.
- Credit the account with income and maturity proceeds on securities contractual payment date.

Sincerely,

Michael D. Skirtich

Michael D. Skirtich
Client Service Officer

Summary of Investment Policy

Under the guidance and direction of the Board and governed by the "prudent man rule", it is the mission of the Fund and the Investment Staff to optimize the total return of the Fund's investment portfolio through a policy of diversified investments using parameters of prudent risk management as measured on the total portfolio, acting at all times in the exclusive interest of the participants and beneficiaries of the Fund.

To accomplish this mission, the Board and Investment Staff understand and accept their fiduciary obligations to the members of the Fund. These obligations are legal in nature and are outlined in the Illinois Pension Code [40 ILCS 5]. Investments made by the Fund shall satisfy the conditions of the Illinois Pension Code and applicable Illinois law and, in particular, the prudent man rule set forth in the Illinois Pension Code [40 ILCS 5/1-109].

Subject to these fiduciary standards, the Board and Investment Staff shall endeavor at all times to implement the Statement of Investment Policy in a manner consistent with the stated mission of the Fund, while ensuring transparency and compliance with all applicable laws and regulations.

The Policy is set forth by the Board in order to:

- Establish a clear understanding of all involved parties of the investment goals and objectives of the Fund.
- Define and assign the responsibilities of all involved parties.
- Establish the relevant investment horizon for which the Fund assets will be managed.
- Establish risk parameters governing assets of the Fund.
- Establish target asset allocation and re-balancing procedures.
- Establish a methodology and criteria for selecting, retaining and terminating Investment Professionals.
- Offer specific guidance to and define limitations for all Investment Managers regarding the investment of Fund assets.

In summary, the purpose of the Statement of Investment Policy is to formalize the Board's investment objectives, policies and procedures and to define the duties and responsibilities of the various entities involved in the investment process. The Statement of Investment Policy is intended to serve as a guide, reference tool and communication link between the Board, Investment Staff and its Investment Professionals.

Investment Objectives

The primary return objectives of the Fund are to:

- Preserve the safety of principal.
- Exceed, after investment management fees, a customized blended benchmark consistent with prudent levels of risk.
- Create a stream of investment returns to ensure the systematic and adequate funding of actuarially determined benefits through contributions and professional management of Fund assets.

To achieve these objectives, the assets of the Fund have been allocated to meet its actuarial assumed rate of return of 7.5%. To evaluate success, the Board compares the performance of the Fund to the actuarial assumed rate of return and its custom benchmark. This benchmark represents a passive implementation of the historical investment policy targets and it is re-balanced regularly.

While achieving the return objectives, the Fund is able to tolerate certain levels of risk, which are:

- To accept prudent levels of short-term and long-term volatility consistent with the near-term cash flow needs, funding level, and long-term liability structure of the Fund.
- To tolerate appropriate levels of downside risk relative to the Fund's actuarial assumed rate of return of 7.5%. In doing so, the Board will attempt to minimize the probability of underperforming the Fund's actuarial assumed rate of return over the long-term and to minimize the shortfall in the event such underperformance occurs.
- To accept certain variances in the asset allocation structure of the Fund relative to the broad financial markets and peer groups.
- To tolerate certain levels of short-term underperformance by the Fund's Investment Managers.

The investment objectives of the Fund are constrained by applicable law, time, taxes and liquidity. The Fund will operate in accordance with applicable law, as amended. The Fund has a long-term time horizon as the assets are used to pay qualified participant pension benefits. The Fund is a tax-exempt entity, but can be subject to taxes involving unrelated business taxable income ("UBTI"). UBTI is income earned by a tax-exempt entity that does not result from tax-exempt activities. The Fund will attempt to minimize or to avoid incurring UBTI. The liquidity needs of the Fund are to meet the regular cash flow requirements of the Fund.

Asset Allocation and Rebalancing Procedures

The Board reviews the target asset allocation of the Fund at least once every three years. It will take into consideration applicable statutes, the actuarial rate of return of the Fund, the long-term nature of the asset pool, the cash flow needs of the Fund and the general asset allocation structure of its peers. It will make assumptions on the capital markets over the long-term and optimize the asset allocation to best meet the actuarial and cash flow needs of the Fund at prudent levels of risk.

The Board establishes the asset allocation targets and ranges and reviews them periodically. To ensure that the allocations meet the risk/return objectives of the Fund, the target allocations will be reviewed annually for reasonableness relative to significant economic market changes or changes to the long-term goals and objectives. Proper implementation of this guideline may require that a periodic adjustment or rebalancing be made to ensure conformance with asset allocation targets. Rebalancing requirements shall be reviewed on a continual basis. Rebalancing may also occur in the event of a change in the allocation percentages of asset class by the Board or subject to extraordinary market events. Rebalancing shall take place as soon as practical after said change or amendment has been approved.

Schedule of Investment Results

	For Year Ended December 31, 2010	Annualized Returns 3 Years	5 Years

Board of Trustees
Forest Preserve District Employees'
Annuity and Benefit Fund of Cook County
33 North Dearborn Street, Suite 1000
Chicago, Illinois 60602

ACTUARIAL CERTIFICATION

We have completed the annual actuarial valuations of the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County (the Fund) as of December 31, 2010. We performed the following actuarial valuations: (1) an actuarial valuation of the pension benefits provided under the Fund for financial reporting purposes pursuant to GASB Statement No. 25, (2) an actuarial valuation of the retiree health insurance benefits provided under the Fund for financial reporting purposes pursuant to GASB Statement No. 43, and (3) a combined actuarial valuation of the pension and retiree health insurance benefits provided under the Fund to determine the financial condition and funding requirements of the Fund.

Since the effective date of the last actuarial valuation, Senate Bill 1946, which was signed into law on April 14, 2010 as Public Act 96-0889, created a "second tier" of reduced benefits for employees who first become participants under the fund on or after January 1, 2011.

We have used the same actuarial assumptions for the December 31, 2010 actuarial valuation as were used for the December 31, 2009 valuation. These actuarial assumptions are based on an experience analysis of the Fund over the period 2005 through 2008.

The funding objective of the Fund is to have contributions sufficient to amortize the unfunded liability over a 30-year period. Employer contributions come from a property tax levied by the County equal to the total amount of contributions made by employees in the calendar year 2 years prior to the year of the levy, multiplied by 1.30. The 1.30 is known as the tax multiple.

For the year beginning January 1, 2011 the net employer contribution to the Fund is expected to cover 26.3% of the actuarially determined contribution requirement. We have estimated that a tax multiple of 4.95 would have been required to have employer contributions cover the full actuarially determined contribution requirement for the year 2011.

GOLDSTEIN & ASSOCIATES
Actuaries and Consultants

The entry age normal actuarial cost method was used for the December 31, 2010 actuarial valuation. This is the same actuarial cost method that was used for the December 31, 2009 valuation.

The asset values used for the valuation were based on the asset information contained in the audited financial statements for the Fund for the year ending December 31, 2010 For purposes of the actuarial valuation, a 5-year smoothed market value of assets was used to determine the actuarial value of assets.

The valuation has been based on the membership data, which was supplied by the administrative staff of the Fund. We have made additional tests to ensure its accuracy.

The trend data schedules presented in the financial section of the Comprehensive Annual Financial Report (CAFR) were prepared by the staff of the Fund based on information contained in our actuarial reports. All exhibits, tables, schedules, and appendices included in the accompanying actuarial section were prepared by us based on information provided by the Fund.

The assumptions and methods used for funding purposes meet the parameters set for the disclosures presented in the financial section by Governmental Accounting Standards Board (GASB) Statement No. 25 and Governmental Accounting Standards Board (GASB) Statement No. 43.

In our opinion, the following valuation results fairly present the financial condition of the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County as of December 31, 2010.

Respectfully submitted,

Sandor Goldstein, F.S.A.
Consulting Actuary

Actuary's Report - Pension Fund

A. Purpose and Summary

We have carried out an actuarial valuation of the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County as of December 31, 2010. The purpose of the valuation was to determine the financial position and annual required contribution of the Fund for reporting purposes pursuant to GASB Statement No. 25. According to GASB Statement No. 25, postemployment healthcare benefits provided by the Fund are not included in this valuation. Pursuant to GASB Statement No. 43, postemployment health care benefits were valued separately and the results of that valuation are presented separately.

This report is intended to present the results of the valuation of the pension benefits provided by the Fund. The results of the valuation are summarized below:

1. Total Actuarial Liability	$252,877,596
2. Actuarial Value of Assets	184,077,516
3. Unfunded Actuarial Liability	68,800,080
4. Funded Ratio	72.8%
5. Annual Required Contribution	
For Year Beginning January 1, 2011	8,590,721

B. Data Used for the Valuation

Participant Data. The participant data required to carry out the valuation was supplied by the Fund. The membership of the Fund as of December 31, 2010, on which the valuation was based, is summarized in Exhibit 1. It can be seen that there were 448 active contributors, 514 members receiving benefits, and 1,049 inactive members included in the valuation. The total active payroll as of December 31, 2010 was $24,397,376.

Assets. In November of 1994, the Governmental Accounting Standards Board (GASB) issued GASB Statement No. 25, which establishes standards of financial reporting for governmental pension plans. The statement is effective for periods beginning after June 15, 1996. Under GASB Statement No. 25, the actuarial value of assets to be used for determining a plan's funded status and annual required contribution needs to be market related. In determining the actuarial value of assets, smoothing changes in the market value of assets over a period of three to five years is considered to be appropriate.

The asset values used for the valuation were based on the asset information contained in the financial statements for the Fund for the year ending December 31, 2010. The actuarial value of assets was determined by smoothing unexpected gains or losses over a period of 5 years. The resulting actuarial value of assets is $184,077,516. The development of this actuarial value of assets is outlined in Exhibit 3. The market value of assets as of December 31, 2010 amounted to $173,898,700.

Exhibit 3

Actuarial Value of Assets

A. Development of Investment Gain (Loss) for 2010		
1. Market Value of Assets as of 12/31/2009		$162,057,788

9. Investment Gain/(Loss) for 2007	(4,537,367)	
10. 20% of Gain/(Loss) for 2007		(907,473)
11. Investment Gain/(Loss) for 2008	(61,106,388)	
12. 40% of Gain/(Loss) for 2008		(24,442,555)
13. Investment Gain/(Loss) for 2009	14,077,397	
14. 60% of Gain/(Loss) for 2009		8,446,438
15. Investment Gain/(Loss) for 2010	8,405,968	
16. 80% of Gain/(Loss) for 2010		6,724,774
17. Actuarial Value of Assets as of December 31, 2010 (8 – 10 – 12– 14 – 16)		$184,077,516

C. Fund Provisions

Our valuation was based on the provisions of the Fund in effect as of December 31, 2010 as provided in Articles 9 and 10 of the Illinois Pension Code. A summary of the principal provisions of the Fund on which the valuation was based is provided in Appendix 2.

D. Actuarial Assumptions and Cost Method

We have used the same assumptions for the December 31,2010 actuarial valuation as were used in the December 31, 2009 valuation. These actuarial assumptions are based on an experience analysis of the Fund over the period 2005 through 2008.

The actuarial assumptions used for the December 31, 2010 valuation are outlined in Appendix 1. In our opinion, the actuarial assumptions used for the valuation are reasonable, taking into account Fund experience and future expectations and represent our best estimate of anticipated experience.

The entry age actuarial cost method was used for the December 31, 2010 valuation, with costs allocated on the basis of earnings. This is the same actuarial cost method that was used for the December 31, 2009 valuation.

E. Actuarial Liability

The actuarial liability as determined under the valuation for the various classes of members is summarized in Exhibit 4. The total actuarial liability is then compared with the actuarial value of assets in order to arrive at the unfunded actuarial liability.

As of December 31, 2010, the total actuarial liability is $252,877,596, the actuarial value of assets is $184,077,516 and the unfunded actuarial liability is $68,800,080. The ratio of the actuarial value of assets to the actuarial liability, or funded ratio, is 72.8%.

Exhibit 4

Actuarial Liability and Funded Status

	Year Ending December 31, 2010	Year Ending December 31, 2009
1. Actuarial Liability For Active Members		
(a) Basic Retirement Annuity	$ 62,829,685	$ 62,376,905
(b) Automatic Increase in Retirement Annuity	18,687,286	18,560,984
(c) Additional Benefits Under Optional Plan	4,342,758	4,936,692
(d) Post-retirement Survivor's Annuity	10,102,682	10,062,485
(e) Pre-retirement Survivor's Annuity	2,185,146	2,163,737
(f) Lump Sum Payments and Refunds	2,461,276	3,578,842
(g) Total	$100,608,813	$100,679,645
2. Actuarial Liability For Members Receiving Benefits		
(a) Retirement Annuities	$ 81,345,165	$ 78,621,075
(b) Automatic Increase in Retirement Annuities	22,626,361	21,962,952
(c) Survivor Annuities to Survivors of Current Retirees	14,617,625	14,023,131
(d) Survivor Annuities to Current Survivors	17,404,316	15,784,300
(e) Lump Sum Death Benefits	139,063	136,961
(h) Total	$136,132,530	$130,528,419
3. Actuarial Liability For Inactive Members	16,136,253	13,417,600
4. Total Actuarial Liability	$252,877,596	$244,625,664
5. Actuarial Value of Assets	184,077,516	188,396,534
6. Unfunded Actuarial Liability	$ 68,800,080	$ 56,229,130
7. Funded Ratio	72.8%	77.0%

F. Employer's Normal Cost

The employer's share of the normal cost for the year beginning January 1, 2011is developed in Exhibit 5. The total normal cost is $5,064,112, employee contributions are estimated to be $2,073,777, resulting in the employer's share of the normal cost of $2,990,335.

Based on a payroll of $24,397,376 as of December 31, 2010, the employer's share of the normal cost can be expressed as 12.26% of payroll.

Exhibit 5

Employer's Normal Cost for Year Beginning January 1, 2011

	Dollar Amount	Percent of Payroll
1. Basic Retirement Annuity	$2,402,943	9.85%
2. Automatic Increase in Retirement Annuity	690,572	2.83
3. Additional Benefits Under Optional Plan	126,899	0.52
4. Post-retirement Survivor's Annuity	356,349	1.46
5. Pre-retirement Survivor's Annuity	151,168	0.62
6. Lump Sum Benefits and Refunds	977,851	4.01
7. Duty Disability Benefits	14,608	0.06
8. Ordinary Disability Benefits	194,821	0.80
9. Children's Benefits	38,897	0.16
10. Administrative Expenses	110,003	0.45
11. Total Normal Cost	$ 5,064,112	20.76%
12. Employee Contributions	2,073,777	8.50
13. Employer's Share of Normal Cost	$2,990,335	12.26%

Note. Normal costs for duty disability benefits, ordinary disability benefits, and children's benefits are calculated on an annual payout basis. The above figures are based on a total active payroll of $24,397,376 as of December 31, 2010.

G. Annual Required Contribution for GASB Statement No. 25

GASB Statement No. 25 requires the disclosure of the annual required employer contribution (ARC), calculated in line within certain parameters. Pursuant to GASB Statement No. 25, we have calculated the annual required contribution for the year beginning January 1, 2011 as the employer's normal cost plus a 30-year level-dollar amortization of the unfunded actuarial liability. Therefore, the annual required contribution (ARC) for the year beginning January 1, 2011 for purposes of GASB Statement No. 25 is as follows:

1. Employer's normal cost	$2,990,335
2. Annual amount to amortize the unfunded liability over 30 years as a level dollar amount	5,600,338
3. Annual required contribution (1 + 2)	$8,590,721

H. GASB Disclosure Information

Governmental Accounting Standards Board (GASB) Statement No. 25 established financial reporting standards for defined benefit pension plans of governmental employers. The statement requires a presentation of "actuarially determined information, from a long-term perspective, about the funded status of the plan and the progress being made in accumulating sufficient assets to pay benefits when due." The information, covering a minimum of six years, is to be provided in two schedules of historical trend information, as follows.

1. The Schedule of Funding Progress provides information about the actuarially determined funded status from a long-term ongoing plan perspective and the progress made toward accumulating sufficient assets, and

2. The Schedule of Employer Contributions provides information about the annual required contribution (ARC) and percent of the ARC actually contributed by the employer.

Based on the results of the December 31, 2010 actuarial valuation as well as the results of previous actuarial valuations, we have prepared a Schedule of Funding Progress and a Schedule of Employer Contributions, which are included in Exhibits 6 and 7.

We have also made calculations to determine the Net Pension Obligation (NPO) as of December 31, 2010. Our calculations have been based on the parameters prescribed in Governmental Accounting Standards Board (GASB) Statement No. 27 for calculating the NPO. According to GASB Statement No. 27, an employer's NPO is equal to the cumulative difference between the annual pension cost and the employer's contribution.

The Net Pension Obligation as of December 31, 2010 is determined in Exhibit 8.

Based on the results of the December 31, 2010 actuarial valuation, we have also prepared a Reconciliation of Change in Unfunded Actuarial Liability. This reconciliation shows the results of several kinds of gains and losses. This financial effect of the most significant gains and losses is illustrated in Exhibit 9.

The following information is applicable to the calculations of the information shown in Exhibits 6, 7, 8, and 9:

Valuation Date	December 31, 2010
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar
Remaining Amortization Period	30 years
Asset Valuation Method	5 year smoothed market value
Actuarial Assumptions	
Investment return rate	7.5% per year
Projected salary increases	5.0% per year
Inflation rate	3.0% per year
Postretirement benefit increase	3.0% per year

Exhibit 6

Fiscal Year	Total Actuarial Liability	Actuarial Value of Assets	Assets as a % of Actuarial Liability	Unfunded Liability	Active Member Payroll	UAL as a % of Active Member Payroll
2001	$184,441,770	$180,733,922	98.00%	$ 3,707,848	$28,631,232	12.95%
2002	212,045,541	172,954,688	81.60%	39,090,853	25,781,400	151.62%
2003	218,727,197	170,114,265	77.80%	48,612,932	17,348,472	280.21%
2004	245,321,025	186,560,109	76.05%	58,760,916	16,635,794	353.22%
2005	217,588,298	189,066,378	86.89%	28,521,920	18,077,621	157.77%
2006	196,983,226 [1]	193,511,049	98.24%	3,472,177 [1]	19,172,756	18.11%

2. Annual Required Contribution (ARC)	7,626,778
3. Interest on NPO	1,262,173
4. Adjustment to ARC	(1,369,893)
5. Annual Pension Cost for 2010 (2 + 3 + 4)	$ 7,519,058
6. Total Employer Contribution for 2010	1,333,140
7. NPO as of 12-31-2010 (1 + 5 - 6)	$23,014,895

Exhibit 9

Reconciliation of Change in Unfunded Actuarial Liability

Over the Period January 1, 2010 to December 31, 2010
Pension Benefit Only for GASB Statement No. 25

1. Unfunded Actuarial Liability as of 01/01/10	$ 56,229,130
2. Employer Contribution Requirement of Normal Cost Plus Interest on Unfunded Liability for Period 01/01/10 to 12/31/10	7,379,158
3. Actual Employer Contribution for the Year, Plus Interest	1,382,229
4. Increase in Unfunded Liability Due to Employer Contribution Plus Interest Being Less Than Normal Cost Plus Interest on Unfunded Liability (2 – 3)	5,996,929
5. Increase in Unfunded Liability Due to Investment Return Lower Than Assumed	9,729,368
6. Decrease in Unfunded Liability Due to Salary Increases Lower Than Assumed	(3,394,112)
7. Increase in Unfunded Liability Due to Other Sources	238,765
8. Net Increase in Unfunded Liability for theYear (4 + 5 + 6 + 7)	12,570,950
9. Unfunded Actuarial Liability as of December 31, 2010 (1 + 8)	$68,800,080

Actuary's Report - Health Insurance

A. Purpose and Summary

We have performed an actuarial valuation as of December 31, 2010 of the retiree health insurance benefits provided by the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County. The purpose of the valuation was to determine the total actuarial liability and annual required contribution for retiree health insurance benefits provided by the Fund for financial reporting purposes pursuant to GASB Statement No. 43. GASB Statement 43 does not apply to the funding of retiree health insurance benefits and valuations for funding purposes may differ significantly from the results presented here.

This report is intended to present the results of the valuation of the retiree health insurance benefits provided by the Fund for purposes of GASB Statement No. 43. The results of the valuation are summarized below:

1. Total Actuarial Liability	$43,102,510
2. Actuarial Value of Assets	0
3. Unfunded Actuarial Liability	43,102,510
4. Annual Required Contribution	
For Year Beginning January 1, 2011	3,830,933

B. Data Used for the Valuation

Participant Data. The participant data required to carry out the valuation was supplied by the Fund. The membership of the Fund as of December 31, 2010, on which the valuation was based, is summarized in Exhibit 1. It can be seen that there were 448 active employees, 275 annuitants currently receiving benefits, and 35 terminated employees entitled to benefits but not yet receiving them.

Exhibit 1

Summary of Membership Data

	Year Ending December 31,	
	2010	2009
1. Annuitants Currently Receiving Benefits	275	282
2. Terminated Employees Entitled		
To Benefits But Not Yet Receiving Them	35	33
3. Active Employees	448	461
4. Total Number of Members	758	776

Assets. Assets are not being accumulated in advance for the payment of retiree health insurance benefits. The benefits are paid out of current year employer contributions. According to the Fund's financial statements, as of December 31, 2010, net assets of the postemployment healthcare plan were $0.

C. Program Provisions

Our valuation was based on the provisions of the Fund in effect as of December 31, 2010 as provided in Articles 9 and 10 of the Illinois Pension Code.

The Fund pays all or any portion of the premium for health insurance on behalf of each annuitant who participates in any of the Fund's health care plans. Currently, the Fund is paying 55% of the total premiums for retiree annuitants, including the cost of any family coverage, and 70% of the premiums for survivor annuitants, including the cost of any family coverage.

An employee who withdraws from service with 10 or more years of service is entitled to a retirement annuity upon attainment of age 50. The surviving spouse of an employee who dies in service or of retiree in receipt of a retirement annuity is entitled to a surviving spouse's annuity.

D. Actuarial Assumptions and Cost Method

In performing the actuarial valuation of the retiree health insurance program for purposes of GASB Statement No. 43, we used such parameters and assumptions as are prescribed in GASB Statement No. 43 for actuarial valuations of retiree health insurance benefits. These parameters and assumptions are described below:

Interest Rate Assumption - Under GASB Statement No. 43, if no assets have been accumulated under a retiree health insurance program, the interest rate assumption is to be based on the investments of the employer. As governmental employers are able to invest only in short term, fixed income securities, we have used an interest rate assumption of 4.5% per year in performing the actuarial valuation of the retiree health insurance program.

Medical Trend Rate Assumption - One of the most important assumptions is the medical trend rate assumption used to increase per member medical costs in future years. The medical trend rate assumption that we have used starts at 8.0% in 2012 and gradually declines to 5.0% by the year 2018 as follows:

Year	Medical Trend
2012	8.0%
2013	7.5%
2014	7.0%
2015	6.5%
2016	6.0%
2017	5.5%
2018 and later	5.0%

D. Actuarial Assumptions and Cost Method (continued)

Per Member Costs

Current Pensioners - We have been provided with information regarding premium rates as of January 1, 2011 for each pensioner currently participating in the retiree health insurance program. We applied the Fund's current reimbursement rates to these premiums to determine the per member cost to the Fund for pensioners currently participating in the retiree health insurance program.

Currently Active Employees - We have been provided with information regarding premium rates as of January 1, 2011 for each of the health insurance plans available to retirees and the number of retirees participating in each plan.

Based on this information, we developed average per member total costs to be used for currently active employees. We developed average per member total costs separately for the following categories:

	Average Total Monthly Cost Per Retiree
1. Employee retirees under age 65	$1,327.95
2. Spouse retirees under age 65	$1,190.91
3. Employee retirees over age 65	$ 618.58
4. Spouse retirees over age 65	$ 411.58

GASB Statement No. 43 provides projection of future retiree health care benefits should be based on actuarial standards issued by the Actuarial Standards Board. Actuarial Standards of Practice No. 6 provides that actuaries should consider the variation of health care costs by age and should use appropriate age bands if the costs vary significantly.

We have therefore developed age-adjusted costs per retiree that are equivalent to the above average costs per retiree by using the Aging Curve for Health Care Costs that is included in Table 4 of the study Aging Curves for Health Care Costs in Retirement, by Jeffrey P. Petertil, published in the July 2005 issue of the *North American Actuarial Journal*.

The percent increases in health care costs by age that are shown in Table 4 of the above paper are as follows:

Age Band	Representative One Year Aging Factor
50-54	3.3%
55-59	3.6%
60-64	4.2%
65-69	3.0%
70-74	2.5%
75-79	2.0%
80-84	1.0%
85-89	0.5%
90 and over	0.0%

D. Actuarial Assumptions and Cost Method (continued)

Applying the previous rates of increases in health care costs by age, we developed costs per retiree by five-year age groups that were equivalent to the above average costs per retiree. This was done separately for the under age 65 costs per retiree and the over age 65 costs per retiree, for both employee retirees and spouse retirees. The cost per retiree by five-year age groups were developed so the total of the age-adjusted costs was equal to the total of the level average costs.

The age adjusted retiree monthly costs that we developed using the above approach are as follows:

Age Band	Age Adjusted Monthly Cost Per Employee Retiree	Age Adjusted Monthly Cost Per Spouse Retiree
50-54	$ 991.65	$ 950.53
55-59	$ 1,174.92	$ 1,126.20
60-64	$ 1,442.58	$ 1,363.60
65-69	$ 518.16	$ 321.00
70-74	$ 593.42	$ 367.63
75-79	$ 663.24	$ 410.88
80-84	$ 714.46	$ 442.61
85-89	$ 741.64	$ 459.45

In determining the costs to the Fund, we took into account that the Fund pays 55% of the total premiums for retirees and 70% of the total premiums for survivors.

Participation Rates - Based on current participation data, we have assumed future participation rates in the retiree health insurance program to be as follows:

Category	Participation Rate
Employee retirees under age 65	61%
Spouse retirees under age 65	33%
Employee retirees over age 65	51%
Spouse retirees over age 65	51%

Other Actuarial Assumptions - The other actuarial assumptions that we used in performing the actuarial valuation of the retiree health insurance benefits provided by the Fund are similar to the actuarial assumptions that we use in the actuarial valuation of pension benefits. These assumptions are outlined in Appendix 1.

The entry age actuarial cost method was used for the December 31, 2010 valuation. This is the same actuarial cost method that we use for the actuarial valuation of pension benefits provided by the Fund.

E. Actuarial Liability

The actuarial liability as determined under the valuation for the various classes of members is summarized in Exhibit 2. The total actuarial liability is then compared with the actuarial value of assets in order to arrive at the unfunded actuarial liability.

As of December 31, 2010, the total actuarial liability for retiree health insurance benefits provided by the Fund is $43,102,510, the actuarial value of assets is $0 and the unfunded actuarial liability is $43,102,510.

Exhibit 2

Actuarial Liability and Funded Status

	Year Ending December 31, 2010	2009
1. Actuarial Liability For Active Members	$20,970,550	$20,560,518
2. Actuarial Liability For Members Receiving Benefits	22,131,960	22,582,459
3. Total Actuarial Liability	$43,102,510	$43,142,977
4. Actuarial Value of Assets	0	0
5. Unfunded Actuarial Liability	$43,102,510	$43,142,977

F. Normal Cost

The normal cost for the year beginning January 1, 2011 is shown below. The total normal cost is $1,247,355. Based on a payroll of $24,397,376 as of December 31, 2010, the total normal cost can be expressed as 5.11% of payroll.

Normal Cost for Year Beginning January 1, 2011

	Dollar Amount	Percent of Payroll
Total Normal Cost	$1,247,355	5.11%

G. Annual Required Contribution for GASB Statement No. 43

Pursuant to GASB Statement No. 43, we have calculated the annual required contribution for the year beginning January 1, 2011 as the normal cost plus a 30-year level-dollar amortization of the unfunded actuarial liability. Therefore, the annual required contribution (ARC) for the year beginning January 1, 2011 for purposes of GASB Statement No. 43 is as follows:

	Year Ending December 31, 2010
1. Total Normal Cost	$1,247,355
2. Annual amount to amortize the unfunded liability over 30 years as a level dollar amount	2,583,578
3. Annual required contribution (1 + 2)	$3,830,933

H. GASB Disclosure Information

Governmental Accounting Standards Board (GASB) Statement No. 43 established financial reporting standards for retiree health insurance plans of governmental employers. The statement requires a presentation of "actuarially determined information, from a long-term perspective, about the funded status of the plan and the progress being made in accumulating sufficient assets to pay benefits when due." The information, covering a minimum of three years, is to be provided in two schedules of historical trend information, as follows:

1. The Schedule of Funding Progress provides information about the actuarially determined funded status from a long-term ongoing plan perspective and the progress made toward accumulating sufficient assets, and

2. The Schedule of Employer Contributions provides information about the annual required contribution (ARC) and percent of the ARC actually contributed by the employer.

Based on the results of the December 31, 2010 actuarial valuation as well as the results of previous actuarial valuations, we have prepared a Schedule of Funding Progress and a Schedule of Employer Contributions, which are included in Exhibits 3 and 4.

We have also made calculations to determine the Net OPEB Obligation (NOO) as of December 31, 2010. Our calculations have been based on the parameters prescribed in Governmental Accounting Standards Board (GASB) Statement No. 45 for calculating the NOO. According to GASB Statement No. 45, an employer's NOO is equal to the cumulative difference between the annual OPEB cost and the employer's contribution.

H. GASB Disclosure Information (continued)

The Net OPEB Obligation as of December 31, 2010 is determined in Exhibit 5.

Based on the results of the December 31, 2010 actuarial valuation, we have also prepared a Reconciliation of Change in Unfunded Actuarial Liability. This reconciliation shows the results of several kinds of gains and losses. This financial effect of the most significant gains and losses is illustrated in Exhibit 6.

The following information is applicable to the calculations of the information shown in Exhibits 3, 4, 5 and 6:

Valuation Date	December 31, 2010
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Dollar
Remaining Amortization Period	30 years
Actuarial Assumptions	
Investment return rate	4.5% per year
Inflation rate	3.0% per year
Increases in Postretirement health care costs	
2012	8.0%
2013	7.5%
2014	7.0%
2015	6.5%
2016	6.0%
2017	5.5%
2018 and later	5.0%

Exhibit 3

Schedule of Funding Progress

Fiscal Year	Total Actuarial Liability	Actuarial Value of Assets	Assets as a % of Actuarial Liability	Unfunded Liability	Active Member Payroll	UAL as a % of Active Member Payroll
2006	$39,448,815	-	0.00%	$39,448,815	$19,172,756	205.75%

Additional Information

Appendix 1: Summary of Actuarial Assumptions and Actuarial Cost Method

The actuarial assumptions used for the December 31, 2010 actuarial valuation are summarized below. These assumptions are based on an experience analysis of the Fund over the period 2005 through 2008. The assumptions were adopted by the Board as of December 31, 2009 based on the recommendation of the actuary.

Mortality Rates. The UP-1994 Mortality Table for Males, rated down 2 years, and the UP-1994 Mortality Table for Females, rated down 1 year.

Termination Rates. Termination rates based on the recent experience of the Fund were used.
The following is a sample of the termination rates used:

Rates of Termination - Age at Entrance

Attained	Males			Females		
Age	27	32	37	27	32	37
27	.145			.183		
32	.116	.165		.117	.165	
37	.030	.105	.141	.030	.093	.114
42	.030	.030	.085	.030	.030	.060
47	.030	.030	.030	.030	.030	.030

Retirement Rates. Rates of retirement for each age from 50 to 75 based on the recent experience of the Fund. The following are samples of the rates of retirement used:

Less Than 30 Years of Service at Retirement

	Rates of Retirement	
Age	Males	Females
50	.010	.012
55	.060	.072
60	.250	.216
65	.150	120
70	.250	.200
75	1.000	1.000

Appendix 1: Summary of Actuarial Assumptions and Actuarial Cost Method (continued)

30 or More Years of Service at Retirement

	Rates of Retirement	
Age	Males	Females
50	.150	.128
55	.300	.213
60	.375	.230
65	.270	.120
70	.450	.200
75	1.000	1.000

Salary Progression. 5.0% per year, compounded annually.

Interest Rate. For the Pension Fund valuation, 7.5% per year, compounded annually. For the Health Insurance valuation, 4.5% per year, compounded annually.

Loading For Reciprocal Benefits. Costs and liabilities of active employees were loaded by 1% for reciprocal annuities where the Forest Preserve District is the last employer. It was assumed that 50% of inactive members with one or more year of service would receive a reciprocal annuity where the District is not the last employer. These reciprocal annuities were valued as of the member's retirement date as 10 times an inactive member's accumulated contributions.

Marital Status. 85% of participants were assumed to be married.

Spouse's Age. The spouse of a male employee was assumed to be four years younger than the employee. The spouse of a female employee was assumed to be four years older than the age of the employee.

Actuarial Cost Method. The entry age actuarial cost method was used, with costs allocated on the basis of earnings. Actuarial gains and losses are reflected in the unfunded actuarial liability and are amortized over an open 30-year period.

Appendix 2: Summary of Principal Provisions

Participant. A person employed by the Forest Preserve District whose salary or wages is paid in whole or in part by the Forest Preserve District. An employee in service on or after January 1, 1984 shall be deemed as a participant regardless of when he or she became an employee.

Service. For all purposes except the minimum retirement annuity and ordinary disability benefit, service during four months in any calendar year constitutes one year of service. For the minimum retirement annuity, all service is computed in whole calendar months. Service for any 15 days in a calendar month shall constitute a month of service.

For purposes of the minimum retirement annuity, service shall include:

a. Any time during which the employee performed the duties of his or her position and contributed to the Fund.
b.Vacations and leaves of absence with whole or part pay.
c. Periods during which the employee receives a disability benefit from the Fund, and
d. Certain periods of accumulated sick leave.

Retirement Annuity – Eligibility. An employee who withdraws from service with 10 or more years of service is entitled to a retirement annuity upon attainment of age 50.

Retirement Annuity – Amount

Money Purchase Annuity. The amount of annuity based on the sum accumulated from the employee's salary deductions for age and service annuity plus 1/10 of the sum accumulated from the contributions by the Forest Preserve District for age and service annuity for each completed year of service after the first 10.

Minimum Formula Annuity. The amount of annuity provided is equal to 2.4% of final average salary for each year of service. Final average salary is the highest average monthly salary for any 48 consecutive months within the last 10 years of service. Salary for pension purposes is actual salary earned exclusive of overtime or extra salary. The maximum amount of annuity is 80% of final average salary.

If an employee retires before age 60, the annuity is reduced by .5% for each full month or fraction thereof that the employee is under age 60 when the annuity begins, unless the employee has 30 or more years of service, in which case there is no reduction for retirement before age 60.

If the Minimum Formula Annuity is greater than the Money Purchase Annuity, the employee is entitled to receive the Minimum Formula Annuity.

Automatic Increase in Retirement Annuity. Employees who retire from service having attained age 60 or more, or, if retirement occurs on or after January 1, 1991, with at least 30 years of service, 3% of the annuity beginning January of the year following the year in which the first anniversary of retirement occurs. If retirement is before age 60 with less than 30 years of service, increases begin in January of the year immediately following the year in which age 60 is attained. Beginning January 1, 1998, increases are calculated as 3% of the monthly annuity payable at the time of the increase.

Appendix 2: Summary of Principal Provisions (continued)

Optional Plan of Contributions and Benefits. During the period through June 30, 2005, an employee may establish optional credit for additional benefits by making additional contributions of 3% of salary. The additional benefit is equal to 1% of final average salary for each year of service for which optional contributions have been paid. The additional benefit shall be included in the calculation of the automatic annual increase and the calculation of the survivor's annuity.

Surviving Spouse's Annuity – Death in Service

Money Purchase Annuity. The amount of annuity based on the accumulated salary deductions and Forest Preserve District contributions for both the employee and the spouse.

Minimum Formula Annuity. A minimum annuity is provided for the eligible surviving spouse of an employee who dies in service with any number of years of service. The amount of such minimum spouse's annuity is equal to 65% of the annuity the employee would have been entitled to as of the date of death, provided the spouse on such date is age 55 or older, or that the employee had 30 or more years of service. If the spouse is under age 55 and the employee had less than 30 years of service, the amount of the spouse's annuity shall be discounted by .5% for each month that the spouse is less than age 55 on the date of the employee's death. The amount of the surviving spouse's annuity shall not be less than 10% of the employee's final average salary as of the date of death.

If the Minimum Formula Annuity is greater than the Money Purchase Annuity, the surviving spouse shall be entitled to receive the Minimum Formula Annuity.

Surviving Spouse's Annuity – Death after Retirement. The amount of the annuity is the greater of the money purchase annuity or the minimum formula. The surviving spouse of an annuitant who dies on or after July 1, 2002 shall be entitled to an annuity of 65% of the employee's annuity at the time of death if the employee had at least 10 years of service, reduced by .5% per month that the spouse is under age 55 at the time of the employee's death. There is no reduction for age if the employee had at least 30 years of service.

Automatic Annual Increase in Surviving Spouse's Annuity. On the January 1 occurring on or immediately after the first anniversary of the deceased employee's death, the surviving spouse's annuity shall be increased by 3% of the amount of annuity payable at the time of the increase. On each January 1 thereafter, the annuity shall be increased by an additional 3% of the amount of annuity payable at the time of the increase.

Child's Annuity. Annuities are provided for unmarried children of a deceased employee who are under age 18. An adopted child is entitled to the child's annuity if such child was legally adopted at least one year before the child's annuity becomes payable. The child's annuity is payable under the following conditions:

a. the death of the employee was a duty related death; or
b. if the death is not a duty related death, the employee died while in service and had completed at least four years of service from the date of his or her original entrance in service and at least two years from the latest re-entrance: or
c. if the employee died while in receipt of an annuity, he or she must have withdrawn from service after attainment of age 50

The amount of the annuity is the greater of 10% of the employee's final salary at the date of death or $140 per month for each child.

Appendix 2: Summary of Principal Provisions (continued)

Duty Disability Benefits. Duty disability benefits are payable to an employee who becomes disabled as a result of an accidental injury incurred while in the performance of an act of duty. Benefits begin on the first regular and normal work date for which the employee does not receive a salary. The amount of the duty disability benefit is equal to 75% of the employee's salary at the date of injury, reduced by the amount the employee receives from Workers' Compensation. However, if the disability, in any measure has resulted from any physical defect or disease that existed at the time such injury was sustained, the duty disability benefit shall be 50% of salary. The Fund contributes the 8.5% of salary normally contributed by the employee for pension purposes.

If the disability commences prior to age 60, duty disability benefits are payable during disability until the employee attains age 65. If the disability begins after age 60, the benefit is payable during disability for a period of 5 years.

Recipients of duty disability benefits also have a right to receive child's disability benefits of $10 per month on account of each unmarried child less than age 18. Total children's disability benefits shall not exceed 15% of the employee's salary.

Ordinary Disability Benefits. Ordinary disability benefits are provided for employees who become disabled as the result of any cause other than injury incurred in the performance of an act of duty. The amount of the benefit is 50% of the employee's annual salary at the time of disability. The Fund contributes the 8.5% of salary normally contributed by the employee for pension purposes.

Ordinary disability benefits are payable after the first 30 days of disability provided the employee is not then in receipt of salary. Ordinary disability benefits are payable until the first of the following shall occur:

a. the disability ceases; or
b. the date that total payments equal the lesser of (1) ¼ of the total service rendered prior to disability, and (2) five years.

An employee unable to return to work at the expiration of ordinary disability benefit is entitled to an annuity beginning on the date of the employee's withdrawal from service regardless of age on such date.

Death Benefit. Upon the death of an active or retired employee, a death benefit of $1,000 is payable to the employee's designated beneficiary or to the employee's estate if no beneficiary has been designated.

Group Health Benefits. The Fund may pay all or any portion of the premium for health insurance on behalf of each annuitant who participates in any of the Fund's health care plans. Currently, the Fund is paying 55% of the premiums for retiree annuitants and 70% of the premiums for survivor annuitants.

Refund to Employee Upon Withdrawal From Service. Upon withdrawal from service, an employee under the age of 55, or anyone with less than 10 years of service is eligible for a refund. The employee is entitled to a refund of the amount accumulated to his or her credit for age and service annuity and the survivor's annuity together with the total amount contributed for the automatic annual increase, without interest. Upon receipt of such refund, the employee forfeits all rights to benefits from the Fund.

Appendix 2: Summary of Principal Provisions (continued)

Election of Refund in Lieu of Annuity. If an employee's annuity or spouse's annuity is less than $150 per month, such employee or spouse annuitant may elect a refund of the employee's accumulated contributions in lieu of a monthly annuity.

Refund For Surviving Spouse's Annuity. If an employee is unmarried at the time of retirement, all contributions for surviving spouse's annuity will be refunded with interest at the rate of 3% per year, compounded annually.

Refund of Remaining Amounts. In the event that the total amount accumulated to the account of employee from employee contributions for annuity purposes has not been paid to the employee and surviving spouse as a retirement or surviving spouse's annuity before the death of the survivor of the employee and spouse, a refund of any excess amount shall be paid to the children of the employee, in equal parts, or if there are no children, to the beneficiaries of the employee or the administrator of the estate.

Employee Contributions. Employees contribute through salary deductions 8.5% of salary to the Fund, 6.5% being for the retirement annuity, 1.5% being for the surviving spouse's annuity, and .5% being for the automatic increase in retirement annuity.

Employer Contributions. The Forest Preserve District levies a tax annually equal to the total amount of contributions made by employees in the calendar year 2 years prior to the year of the levy, multiplied by 1.30.

Employer Pick-up of Employee Contributions. Since April 15, 1982, regular employee contributions have been designated for federal income tax purposes as being made by the employer. The employee's W-2 salary is therefore reduced by the amount of contribution. For pension purposes, the salary remains unchanged. For purposes of benefits, refunds, and financing, these contributions are treated as employee contributions.

Appendix 3: Glossary of Terms Used in Report

1. **Actuarial Present Value.** The value of an amount or series of amounts payable at various times, determined as of a given date by the application of a particular set of actuarial assumptions.

2. **Actuarial Cost Method or Funding Method.** A procedure for determining the actuarial present value of pension plan benefits and for determining an actuarially equivalent allocation of such value to time periods, usually in the form of a normal cost and an actuarial accrued liability.

3. **Normal Cost.** That portion of the present value of pension plan benefits, which is allocated to a valuation year by the actuarial cost method.

4. **Actuarial Accrued Liability or Accrued Liability.** That portion, as determined by a particular actuarial cost method, of the actuarial present value of pension benefits which is not provided for by future normal costs.

5. **Actuarial Value of Assets.** The value assigned by the actuary to the assets of the pension plan for purposes of an actuarial valuation.

6. **Unfunded Actuarial Liability.** The excess of the actuarial liability over the actuarial value of assets.

7. **Entry Age Actuarial Cost Method.** A cost method under which the present value of the projected benefits of each individual included in an actuarial valuation is allocated as a level dollar amount or level percent of the individual's earnings between entry age and assumed exit age. The portion of this actuarial present value of benefits allocated to a valuation year is called the normal cost. The portion of this actuarial present value of benefits not provided at a valuation date by the actuarial present value of future value of normal costs is called the actuarial liability.

Under this method, the actuarial gains (losses), as they occur, generally reduce (increase) the unfunded actuarial liability.

8. **Actuarial Assumptions.** Assumptions as to future events affecting pension costs.

9. **Actuarial Valuation.** The determination, as of the valuation date, of the normal cost, actuarial liability, actuarial value of assets, and related actuarial present values for a pension plan.

10. **Vested Benefits.** Benefits that are not contingent on an employee's future service.
